Manufacturing Renaissance in EU

World Manufacturing Forum

... this is why Manufacturing is such a pivotal sector for Europe

Importance of Manufacturing sector in the EU (% on the total economy)

Manufacturing evolution 1970s-2000s

The "SMILE" challenge: European businesses must focus on high value added activities

Value Added

- Value creation in Manufacturing is progressively shifting **towards pre-production** (R&D and Design) and **post production** (marketing and Pre-or-After sales service) activities

FI-driven Innovation in Manufacturing

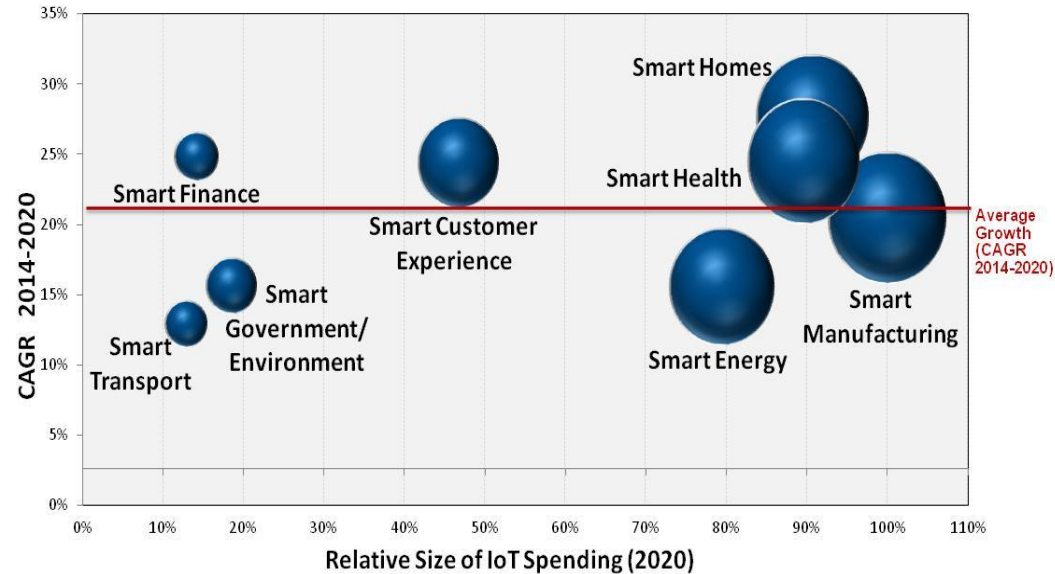

IoT By Vertical 2020

Source: IDC 2014

Smart Manufacturing is one of the most promising domains for IOT-driven innovation (24% of the estimated IOT EU market size)

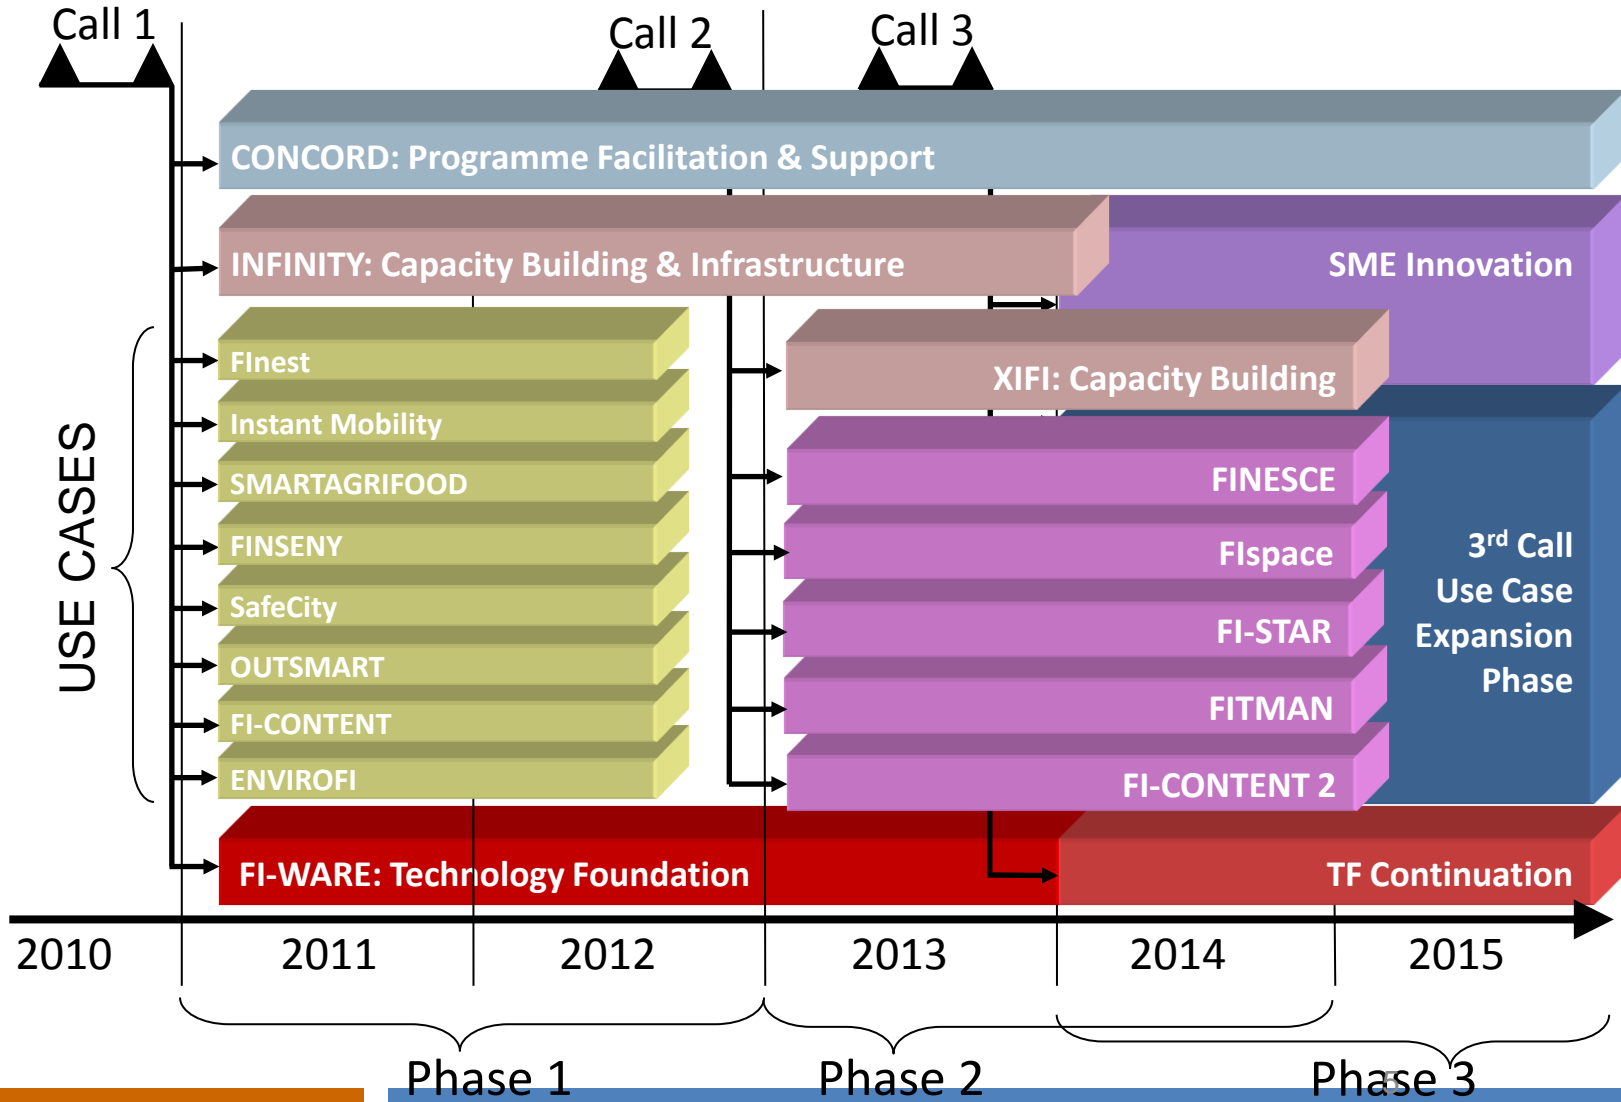

Smart Manufacturing excels not just in the potential size of the market, but is also well positioned regarding the estimated growth of such a market

FIWARE Catalogue <http://catalogue.fiware.org/>

FIWARE GENERIC ENABLERS

Generic Enablers (GE) offer a number of general-purpose functions, offered through well-defined APIs, easing development of smart applications in multiple sectors. They will set the foundations of the architecture associated to your application.

Specifications of FIWARE GE APIs are public and royalty-free. You can search for the open source reference implementation, as well as alternative implementations, of each FIWARE GE in the FIWARE Reference Architecture.

DATA/CONTEXT

Data/Context Management

Easing access, gathering, processing, publication and analysis of context information at large scale.

INTERNET OF THINGS

Internet of Things (IoT) Services Enablement

Make connected things available, searchable, accessible, and usable.

ADVANCED UI

Advanced Web-based User Interfaces

3D & AR capabilities for web-based UI.

SECURITY

Security

Make delivery and usage of services trustworthy by meeting security and privacy requirements.

I2ND

Interface to Networks and Devices (I2ND)

Build communication-efficient distributed applications, exploit advanced network capabilities and easily manage robotic devices.

APPS

Architecture of Applications / Services Ecosystem and Delivery Framework

Concepts, publish, orchestrate and consume applications/services, addressing all business aspects.

CLOUD

Cloud Hosting

Provides computation, storage and network resources to manage services.

DOMAIN SPECIFIC ENABLERS

The FIWARE Catalogue will be extended to include domain-oriented enablers to be combined with those serving general purposes (Generic Enablers - GE). They will cover functionalities that are specific and will help accelerating development of applications, in certain domains.

The perfect solution to make your app focus on a specific vertical.

BUNDLES

BUSINESS FRAMEWORK CONSUMPTION

The Business Framework Consumption Bundle includes a set of GEs that support different monetization and revenue sharing features.

DATA CONTEXT STREAMS

Context Streams generation storage and analysis.

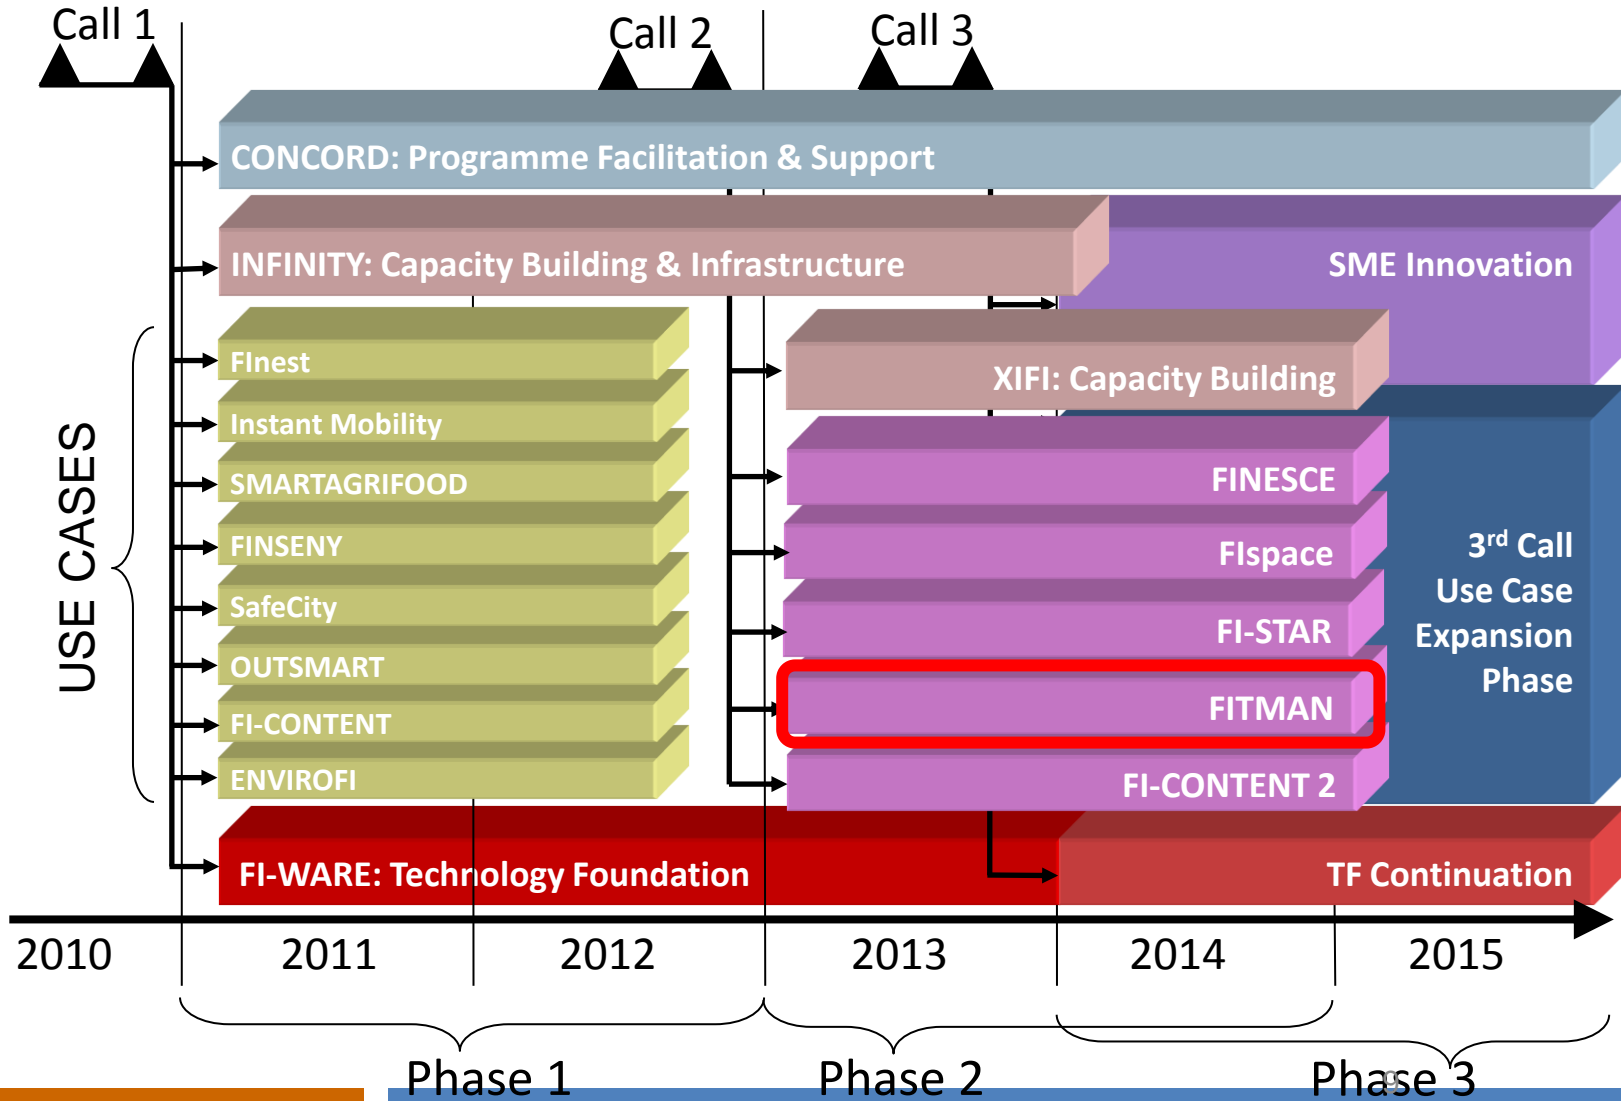

WIRELOUD MONETIZATION

The Wirecloud (App Mashup) Monetization Bundle represents one of the use cases of the Business Framework and intends to show the potential of the BF features provided by FIWARE in a concrete use case. This use case is based on the use of the business framework.

FITMAN Factsheet

Project No:	604674
Project Full Name:	F uture I nternet T echnologies for MAN ufacturing
Duration:	30 months
Start date:	April 1 st 2013
Partnership:	36 partners, 11 countries
Strategic Objective:	FP7-2012-ICT-FI FI.ICT-2011.1.8: Use Case scenarios and early trials
Total Eligible Cost:	18.034.000 EURO
EC Contribution:	12.890.000 EURO
Project Web Site:	www.fitman-fi.eu

FITMAN Beneficiaries

Core Consortium (10 partners)

Original Equipment Manufacturers (4 partners)

SME Networks and Associated S/T (14 partners)

Open Call winners (8 partners)
